"I like a combination of contemporary and antiques but most of all, I like a room to seem inviting and not off-putting or too precious. After all, people need to live in the space. The upholstered pieces are all in indoor-outdoor fabric so children and pets can climb all over the furniture and a sponge and soap and water will clean up anything."

"We love the wall of windows, which makes one feel as though the room is open to the outdoors. We both like a mix of the traditional and the modern. We paired a hand-carved and weathered farm table with a sleek light fixture and curtain fabric with a geometric pattern."
